\*\*Review of resources should include:  
 - Uniqueness  
 - Value to LC/Researchers (provide justification/rationale)  
 - Terms of Use (acceptable / any flags?)

Issue(s):  
 Approvals: Should there be a higher level of sign off for approving staff time? Resource records in ERMS versus individual titles. May be a case by case review depending on collection development policy.

Technically feasible: For free resources this will most likely be browser versions and/or add-ons, etc.

Note: May include gift items.
