# BIBFRAME:

## NOT JUST WALKING, BUT RUNNING

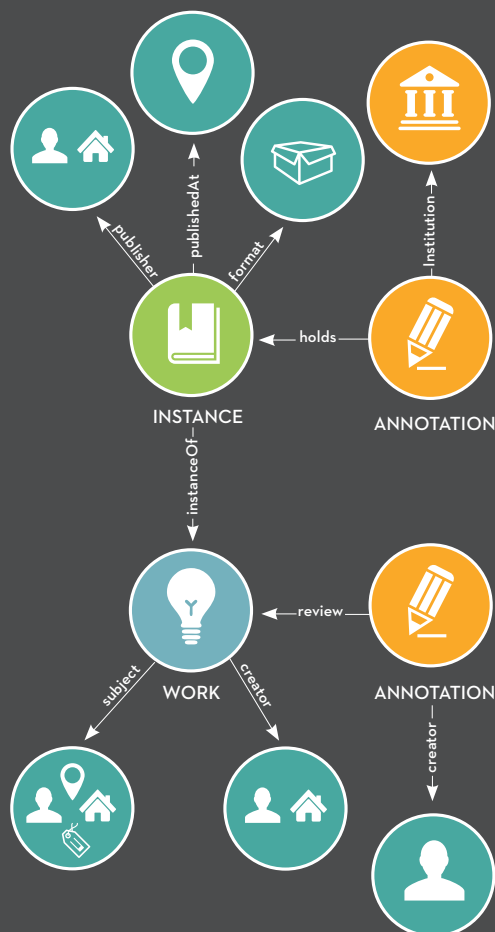

The BIBFRAME Initiative is a community endeavor led by the Library of Congress to re-imagine and implement a bibliographic environment for a post-MARC world.

### BIBFRAME CHRONOLOGY

### BIBFRAME DATA MODEL CORE CLASSES

- WORK**: A resource reflecting a conceptual essence of the cataloging item
- INSTANCE**: A resource reflecting an individual, material embodiment of a Work
- AUTHORITY**: A resource reflecting an authority concept which has a defined relationship to a Work or Instance
- ANNOTATION**: A resource that augments another main BIBFRAME class when knowing who asserted the Annotation is vital information

At the advent of 2014, with serious, hands-on work beginning little more than a year ago and a half ago, BIBFRAME—as an Initiative, as a data model, as a vocabulary—is **not just walking, its running**.
